# Installation Instruction

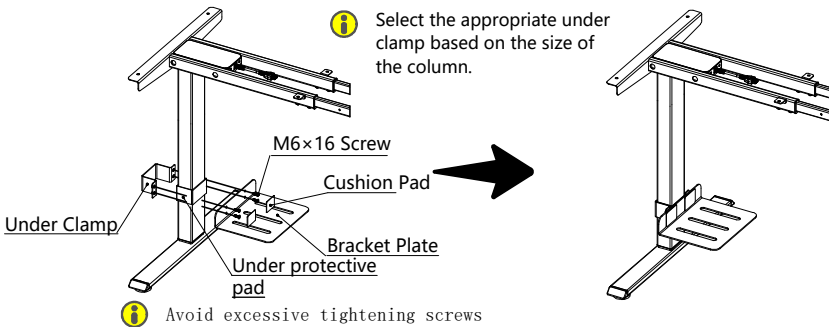

## STEP 1

- According to the height dimensions of the computer mainframe, the upper protective pad and under protective pad are tightly attached to the column and wraps the column. Cut off the excess length.

## STEP 2

- Fix the under clamp and the bracket plate together with the under protective pad. After tightening with the M6×16 screws, attach the cushion pads to prevent the screws from damaging the computer mainframe.

## STEP 3

- According to the illustration, first place the computer mainframe on the bracket plate. Fix the upper clamp and the adjustment bracket together with the upper protective pad. Tightening with the M6×16 screws.
- Place the adjustment plate beneath the adjustment bracket, adjust it to the appropriate position, and then tighten the thumb screw.
